Portfolio:

<https://codemikemike.github.io/cv-site/>

Profile

Datatatiker student focused on backend development, scalable systems and maintainable software architecture.

I work with C#, .NET, ASP.NET Core, SQL Server, Docker and GitHub workflows. My primary interest is building structured backend systems with clean separation of concerns, secure APIs and deployment-friendly architecture.

Technical Skills

- C#
- .NET
- ASP.NET Core
- REST APIs
- JWT Authentication
- Entity Framework Core

Backend

Database

- SQL Server
- Relational database design
- Repository pattern
- Data access abstraction

DevOps & Tools

- Git
- GitHub
- GitHub Pages
- GitHub Actions
- Docker
- VS Code

Architecture & Methods

- Clean Architecture

- Layered Architecture
- Interfaces
- Repositories
- Separation of Concerns
- Maintainability
- System Development

Experience

Group Leader – Danish Army Engineer Regiment, Skive

Former group leader within the Danish Engineer Regiment in Skive.

Worked with:

- leadership
- responsibility
- coordination under pressure
- teamwork
- planning and structure

The experience strengthened my discipline, adaptability and ability to maintain overview in demanding situations.

Co-Founder / Volunteer – Coding Pirates Vrå

Helped establish Coding Pirates in Vrå — a non-profit initiative focused on strengthening children's technological creativity and IT skills through playful learning and programming activities.

Contributed to creating a local community around:

- programming
- technology
- creativity
- digital learning for children and young people

Capture The Flag (CTF) & Cybersecurity Interest

Active interest in cybersecurity and online Capture The Flag challenges, including intelligence-themed and security-oriented problem solving environments.

Areas of interest include:

- OSINT
- problem solving

- security thinking
- technical analysis
- investigative methodology

Projects

Slottets-Drifttavlen

Semester project focused on backend structure, maintainability and system development.

- C#
- ASP.NET Core
- SQL Server
- Docker
- GitHub
- Clean Architecture

- Repository structure
- Interface-based design
- Persistent data layer
- Maintainable backend architecture
- Deployment-friendly project setup

Developer Portfolio / CV Site

Modern developer portfolio hosted with GitHub Pages.

- HTML
- CSS
- JavaScript
- GitHub Pages
- GitHub Actions
- Markdown
- Pandoc PDF generation

- Static site deployment

- Markdown-based CV
- Automated PDF generation
- Clean frontend structure
- Maintainable project documentation

Education

UCL Erhvervsakademi og Professionshøjskole – Datamatiker, Odense

Currently studying Computer Science / Datamatiker with focus on:

- software development
- system architecture
- databases
- APIs and backend systems
- security
- deployment and maintainability
- project collaboration

The education combines practical software development with system design, programming and modern development workflows.

HF & Supplementary Higher Education Courses

Completed HF and additional upper secondary level subjects, including engineering admission courses related to Aalborg University.

Personal Profile

Beyond software development, I am also a dedicated father to my young son and deeply value being present in his growth, curiosity and development.

I have travelled extensively and lived abroad for periods of time, which has strengthened my adaptability and ability to navigate new environments and cultures comfortably.

I thrive in learning-oriented environments and enjoy combining technical curiosity with structure, creativity and continuous improvement.
