

Mike

C# .NET Backend Developer

Denmark

GitHub: <https://github.com/codemikemike>

Portfolio: <https://codemikemike.github.io/cv-site/>

Profile

Datatiker student focused on backend development, clean architecture and maintainable software systems.

I work with C#, .NET, ASP.NET Core, SQL Server, Docker and GitHub workflows. My main focus is building structured backend systems with clear separation of concerns, secure APIs and deployment-friendly architecture.

Technical Skills

Backend

- C#
- .NET
- ASP.NET Core
- REST APIs
- JWT Authentication
- Entity Framework Core

Database

- SQL Server
- Relational database design
- Repository pattern
- Data access abstraction

DevOps & Tools

- Git
- GitHub
- GitHub Pages
- GitHub Actions
- Docker
- VS Code

Architecture & Methods

- Clean Architecture
- Layered Architecture
- Interfaces
- Repositories
- Separation of Concerns
- Maintainability

- System Development
-

Projects

Slottets-Drifttavlen

Semester project focused on backend structure, maintainability and system development.

Technologies:

- C#
- ASP.NET Core
- SQL Server
- Docker
- GitHub
- Clean Architecture

Focus areas:

- Repository structure
 - Interface-based design
 - Persistent data layer
 - Maintainable backend architecture
 - Deployment-friendly project setup
-

Developer Portfolio / CV Site

Modern developer portfolio hosted with GitHub Pages.

Technologies:

- HTML
- CSS
- JavaScript
- GitHub Pages
- GitHub Actions
- Markdown
- Pandoc PDF generation

Focus areas:

- Static site deployment
 - Markdown-based CV
 - Automated PDF generation
 - Clean frontend structure
 - Maintainable project documentation
-

Education

Datamatiker

Software development education focused on:

- Programming

- Databases
 - System development
 - Web development
 - Architecture
 - Testing
 - Deployment
 - Project work
-

Current Focus

- Building stronger C# and .NET backend skills
 - Understanding software architecture deeply
 - Improving Clean Architecture usage
 - Learning professional GitHub workflows
 - Creating maintainable developer projects
-
